Farhan Akhtar

B.tech | CSE(AIML) | 1st Year | Web Developer

About Me

I am an aspiring Computer Science Engineer, currently pursuing my B.Tech in CSE(AIML) at KIET Group of Institutions, Ghaziabad. With a strong interest in Artificial Intelligence, Machine Learning, and Data-Driven Technologies, I am passionate about building solutions that combine innovation with real-world impact. Along with academics, I actively explore competitive programming, web development, and problem-solving, aiming to strengthen my technical foundation and contribute to impactful projects. I also enjoy following cricket and music, which help me stay creative, motivated, and balanced. My goal is to grow as a skilled software engineer and work on cutting-edge technologies in AI/ML, data science, or software development, contributing to both industry and society.
